For Immediate Release:

Duty of Care provider e-Travel Technologies receives Cyber Security Validation

e-Travel Technologies Inc of Mississauga Ontario Canada today reports the results of a Cyber Security audit performed by Calian Inc and HumanLed Inc of Ottawa Canada.

The overall assessment on Travel Tracker v2.0 was guided by the principles outlined in the National Institute of Standards and Technology (NIST)

The report states: "Within the context and scope of this assessment, Travel Tracker v2.0 exceeds industry standards in system and software security in all assessed areas using the designated standards, data categorization and intended functions and use by the identified users," continuing with, "Areas assessed were Application, Database, User Access and Login, Server Security, Data Centers, Secure Connection, Browsers and Security Policy and Procedures.

Don Churchill, President of e-Travel Technologies Inc, stated "We are extremely pleased with the results of this audit, as it shows that our recently released Traveler Tracker 2.0 Duty of Care product meets or exceeds the cyber security standards required by both the United States and Canadian governments, arguably the most stringent in the world," adding, "that our clients, and their clients, can rest assured that their traveler's data is secure and protected."

Valarie Findlay, President of HumanLed Inc, commented "With the very valid concerns relating to cyber-security and protection of data and assets, it is very refreshing to see companies, such as e-Travel Technologies, taking such proactive steps and exercising substantial effort in protecting client transactions and data."

About Calian Inc

Calian employs over 2300 people with offices across Canada and projects that span domestic and international markets. For over a decade Calian's team has been working with clients to help them protect their applications, data and networks. In today's world the threat, potential damage and associated liability has never been greater to organizational assets.
